- REDUX
- NODE JS
- EXPRESS JS
- MONGODB
- NEXT JS
- CSS, SCSS
- FRAMER-MOTION
- STYLED-COMPONENTS

ASILBEK ANVARBEKOV

FULL STACK WEB DEVELOPER

OVERVIEW

- I am a self-taught programmer and have been programming since 2019. The way i have been learning these skills is to follow the official documentations, listening to other professionals, watching videos on YouTube and actually coding and practicing and of course joining communities like stackoverflow, etc..
- I'm an experienced senior front-end and middle back-end JavaScript based web developer. My current solution for a full stack web framework is Next JS with MongoDB.
- I've worked a lot on design projects, as to full stack projects I've mostly done CRUD apps upon REST API. For example, some of them were Instagram Clone, Linkedin Clone, Admin Panel.
- I love css and javascript challenges. I always take time to solve small but difficult apps and games without any third-part libraries.
- I have freelanced and helped some people to turn their project ideas into reality. One of them was bolahuquqlari.uz that I coded some of their games logic in javascript.

JOB EXPERIENCE

A Front-end React JS Web Developer in Radiomer uz

Apr 2021 - Sep 2021

- **Type:** Full-time office work.
- **Technologies I used:** React js, Ant Design, Styled-components, Framermotion, Ajax.
- **Responsibilities:** Problem solver, good communication skills, creative, understanding others code and improve it if necessary. Connecting back-end to front-end. Building complex layouts and functionalities: responsiveness, admin page, forms, dynamic crud operations, user roles, authentication and authorization and more.
